How to find Creative Commons licensed images using Google

A note about Creative Commons:

Images licensed under Creatives Commons Licenses can be freely shared, copied, and redistributed in any medium or format, as long as you attribute the creator of the material correctly. Some Creative Commons Licenses have additional terms and conditions (e.g. restrictions on commercial use) so you should always read the license information before you decide to use an image.

To attribute correctly, you must:

- Provide the author’s name and the title of the work
- If possible, provide a link back to the source of the work
- Provide a link to the CC licence that applies to the original work
- Indicate if you made any changes to the work
- Keep intact any copyright notice the author has provided

To find Creative Commons licensed images:

**STEP 1.** Go to Google:

**STEP 2.** Select Images.

**STEP 6.** Select a license type from the list.

**Tip:** choose the license type that best suits your needs.

**STEP 7.** To select an image, click on it, then click on **Visit page**.

**Note:** it is very important that you don’t copy the image directly from the search results page. You need to visit the website identify the creator and read the license conditions.
STEP 8. Read the license conditions and decide if the image meets your needs. The location of the license will vary depending on the website, but it’s important that you locate and read it. There will usually be a link taking you to a full explanation of the Creative Commons License being used.

STEP 9. Record the following information about the image:

- the name of the creator
- the title of the work
- the URL of the website on which the image appears
- the URL of the Creative Commons License.

STEP 10. Download and save the image. Remember to attribute the image every time you use it.
